EXAMINER'S REASON FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance, the newly cited prior art of record HUTCHISON et al. (US 5,838,989) filed 06/01/05 teaches and does not teach:

HUTCHISON teaches a switch interface for coupling a network station of the CSMA/CD type to a network wherein a single interface connector is used to connect a twisted-pair medium, using the 10BASE-T protocol, (Figs. 4a and 4b) or to a medium of a different type, through an AUI protocol and an appropriate media attachment unit. However, HUTCHISON is silent in respect to *individual controllers* for the plurality of types of mini-plugs that may be inserted in the signal transmission path. Further, HUTCHISON does not teach a controller processor will send and receives input and output control signals that corresponding one of said plurality of individual controllers and wherein each of said plural control signals having different input and output amplitudes and to discriminate the type of control signals is carried out on the basis of an amplitude of the control signals at the single transmission path for an input and output of control signals.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
